EDUCATION

University of California, San Diego Sep.2026-present
Master of Science in Data Science

City University of Hong Kong Sep.2019-Jun.2023
Bachelor of Science in Computer Science

SKILLS

Programming - Python, SQL, HTML, CSS, JS, C++, Java
Framework – Ray, Vue, React, Django, PyTorch
Big Data - Informatica, DataStage, Apache Hadoop/Spark/Flink, Kafka
Cloud & DevOps – AWS, Docker, k8s
ML & AI- Distributed inference (vLLM)
Certification : AWS Certified Cloud Practitioner

WORK EXPERIENCE

Huawei | vLLM Apr.2024-Aug.2026
AI Engineer, Hong Kong AI framework &Data Tech Lab Hong Kong

- Core contributor to vLLM-Omni: designed Qwen3-Omni async-chunk stage overlap (66% lower single-request E2E latency); developed full-duplex AURA and MiniCPM-o 4.5 pipelines; optimized TTS serving for VoxCPM and Qwen3-TTS; developed MiniCPM continuous batching & async chunk (+83% request / +102% audio throughput, -75% audio TTFP); and built nightly accuracy/performance CI plus shared scheduler lifecycle contracts. || https://arxiv.org/pdf/2602.02204 || https://github.com/vllm-project/vllm-omni
- Optimized inference performance in Huawei's vLLM framework by implementing tensor/pipeline/sequence parallelism, KV cache optimization, and developing chunked prefill pipeline (CPP) achieving 2.8x throughput improvement. Enhanced communication efficiency by optimizing the communicator based on PyTorch or Ascend HCCL for improved distributed training performance. Implemented PD (prefill-decoding) disaggregation architecture with dynamic scheduling for service discovery based on Ray/Yuanrong. Successfully deployed these optimizations to Huawei Xiaoyi AI assistant on mobile devices.
- Design and Development of Checkpoint, Job Management, and Query in YuanRong Lightweight Stream Processing Framework, a Huawei product similar to Apach Flink; *https://gitee.com/openeuler/yuanrong-datasystem*
- Design and Development of Reporting Stream Process System's Customized Metrics and Alarm to Huawei Cloud AOM;
- Automated Test Case Development for Kafka Message Handling and Fault Recovery;

HKT Jul.2023-Mar.2024
Data Engineer Hong Kong

- Handling data warehouse's missing data;
- Collecting data from various sources such as Oracle, Redshift, and Hadoop, and utilizing tools like Informatica, DataStage, and Spark to perform the Extract, Transform, and Load (ETL) process on the data;
- Utilize various AWS services, including Glue, Step Functions, Lambda, S3, EC2, CodeCommit, Secretes Manager, EventBridge and DynamoDB etc, to efficiently handle data storage, data integration, data warehousing， and ETL tasks;
- Utilize CodeBuild, CodeCommit, CodePipeline, CloudFormation to do CICD;
- Create a data pipeline scheduling tools using EventBridge.

Hospital Authority Jul.2021-Jul.2022
Intern Hong Kong

- Executed the React Project independently, utilized react to establish a corporate Intranet website, and guided employees to learn to use the relevant libraries;
- Maintained the monitoring portal of the API, and updated it monthly;
- Created Jenkins pipelines according to the document and did related CICD job using Github action101, openshift, Jfrog, buildpacks & docker;
- Completed and designed 5 meeting portals for 5 teams using birtix24 and carried out the whole maintenance;
- Maintained the learning website for company employees, uploaded learning videos to Emby, and updated relevant database information regularly;
- Conducted comparative analysis of the paid and unpaid low code platform commonly used in the market;
- Wrote the company's monthly IT related newspapers and made relevant posters, of which topic involves the usage of Github Copilot, Github Security features, Github Code review, and DVC.

COMMUNITY ENGAGEMENT

Swift Playgrounds Project, City University of Hong Kong & Apple Nov.2022-May.2024
Teaching Assistant

- Responsible for teaching students how to use Swift playgrounds;

Ruirui YANG

Tel: +852 92412991/ +1 (858) 405-4934 | E-mail: reinyang72@outlook.com

- Helped students solve programming problems and summarized problems that arise in the course and reported weekly briefings to the professor.
